Activate and set up your Nuance Audio Glasses

Find the Nuance Audio App

For easy use of your Nuance Audio Glasses, our intuitive mobile app allows you change audio modes, control volume, and reduce background noise – all from your phone.

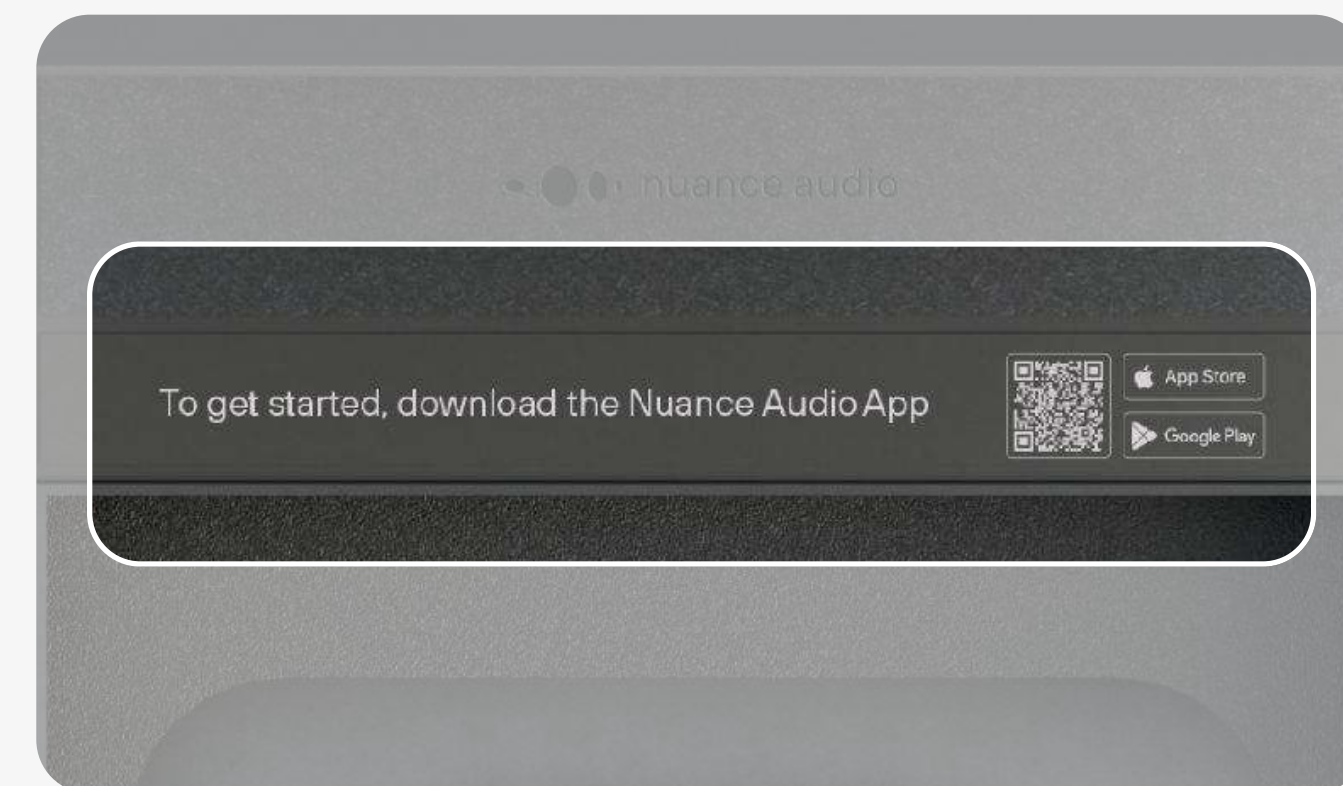

Option A.

Scan the QR Code with your phone and **Download**

**Notes**
You can find the QR Code also on the core box

Option B.

Search for "Nuance Audio" in the App Store or Google Play Store and **Download**

Nuance Audio

Download from your device's app store

To activate and personalize your Nuance Audio Glasses, **download the Nuance Audio App** from the iOS App Store or Google Play Store.

Apple App Store
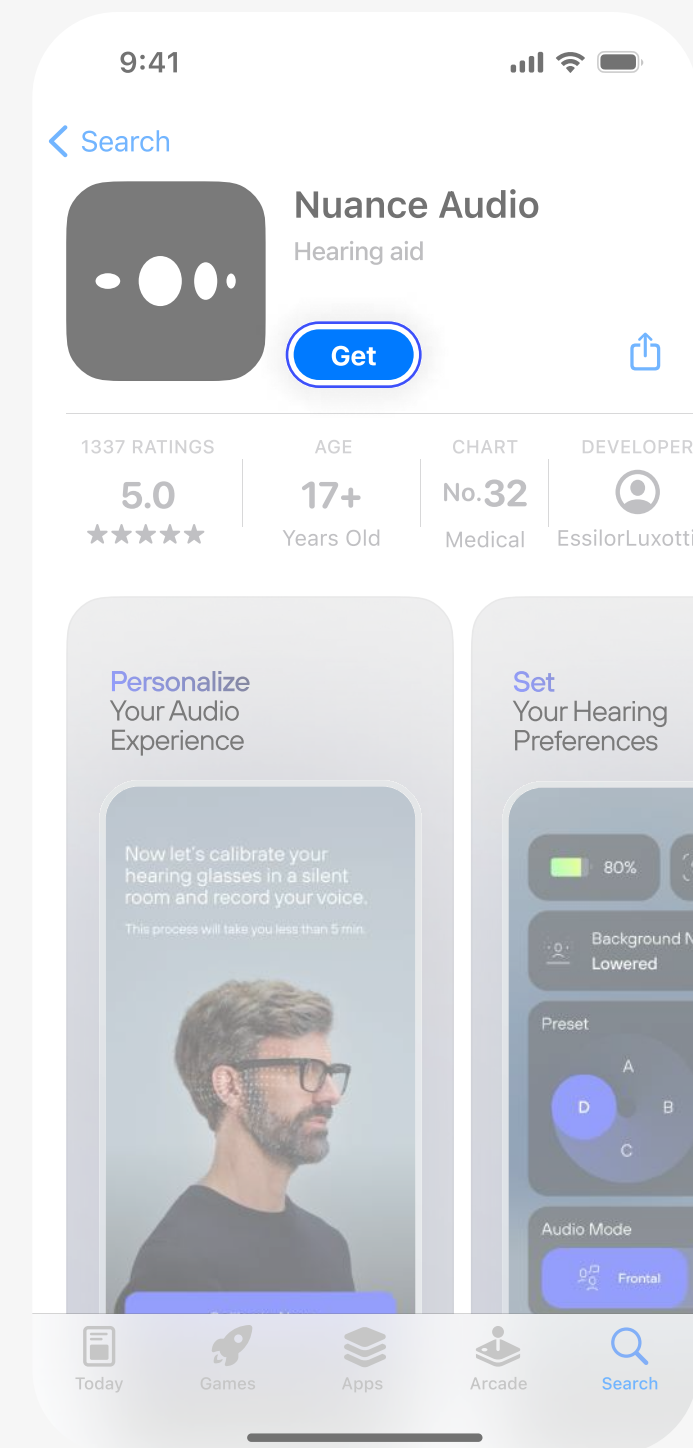

Search for "Nuance Audio" in the iOS App Store and tap **Get**

the Get button will change to Open. You can launch the app from the App Store or find it on your home screen.

Google Play Store

Search for "Nuance Audio" in the Google Play Store and tap **Install**

the Get button will change to Open. You can launch the app from the Store or find it on your home screen.

Sign up

Once you have downloaded the App, you can proceed with the Sign Up.

Pair

Cancel

Accept the request to pair with your iPhone. Press **Pair**

Done

Pairing complete.

How to make the most of your Calibration?

Calibration takes just one minute but helps you get the best from your Nuance Audio Glasses.
If you own multiple pairs, calibrate each one individually.

**A few tips to optimize
Personal Calibration:**

- Find a silent spot in your home, avoiding large or open spaces.
- Stay away from areas with many or large windows.
- Avoid rooms with high ceilings where background noise can be unpredictable.
- Position yourself away from corners and avoid facing mirrors.
- Ideally, stay as close to the center of the room as possible for optimal sound quality.
- Final tip: Your bedroom is often the best option.

**A few tips to optimize
Voice Calibration:**

- Speak loudly but without shouting.
- Project your voice as if speaking to someone across the room.
- Minimize pauses as much as possible.

Personal calibration

Calibrating will optimize your Glasses' audio performance to your head shape including:

- Acoustic feedback reduction
- Own voice reduction

To start calibrating, find a silent room.

Press **Start calibration**

Notes
The calibration feature can be found in the settings. We recommend to perform calibration every 6 months.

Allow your phone's microphone to measure and validate sounds.
Press **Allow**

A pop-up will remind you to **keep your Nuance Audio Glasses on** during the entire process.
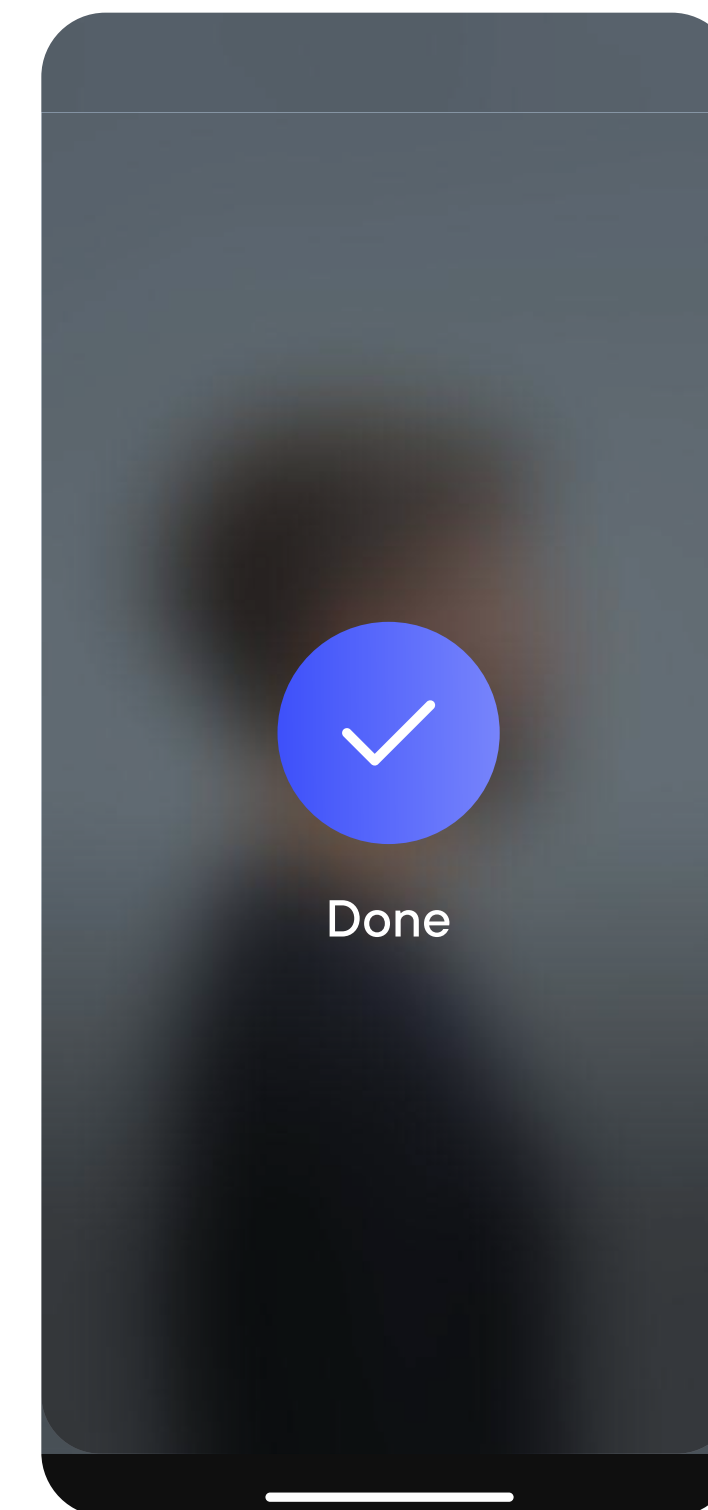

Personal calibration

Step 1.1
Environmental noise measurement.
Keep your glasses on and tap **Play audio sample**

Step 1.2
Stay still and don't take off your glasses, **wait until the end of the audio sample.**

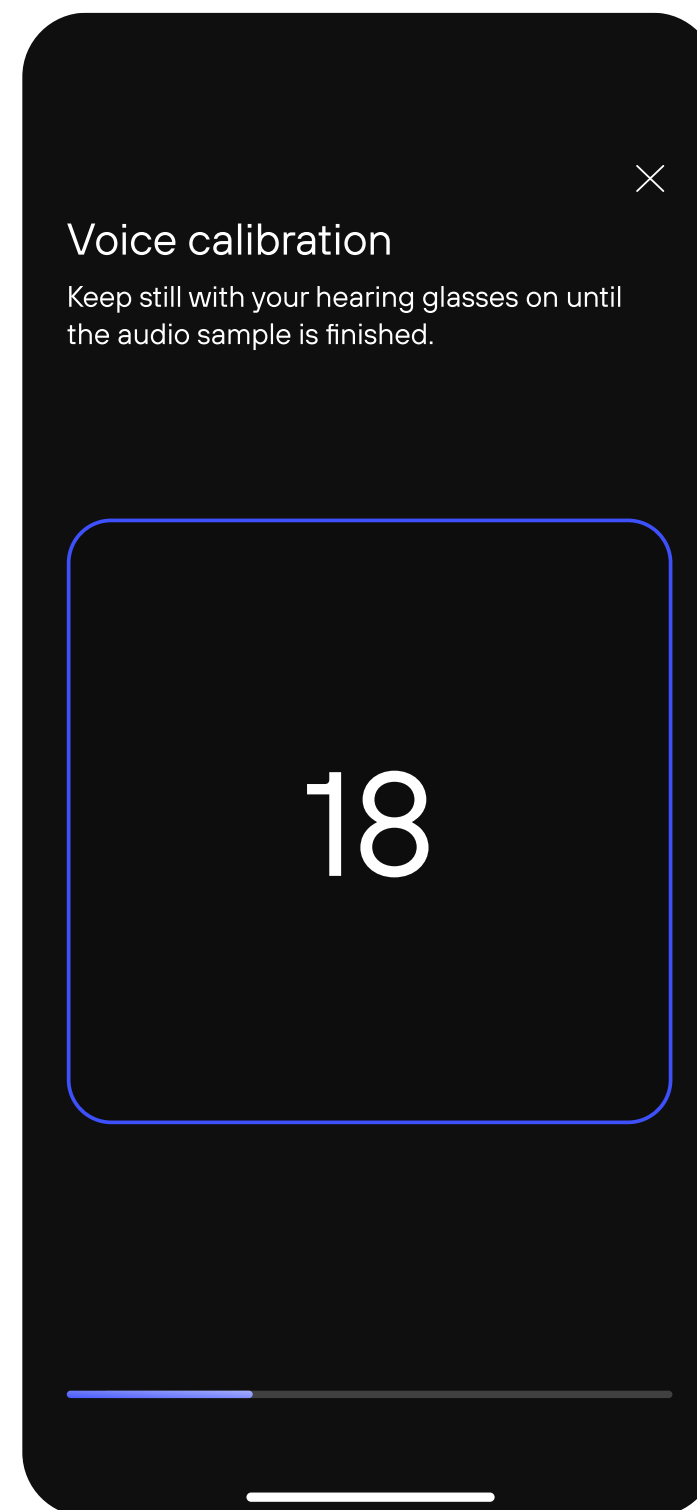

Step 1.3
Environmental noise measurement completed.

Voice calibration

Step 2. 1
Own voice calibration.
Stay still and don't take off
your glasses
Press **Start recording**

Voice calibration
Keep still with your hearing glasses on until the audio sample is finished.

Get ready to count up to 20

Start recording

Step 2. 2
Count out loud until the progress bar reaches the end.

Voice calibration
Keep still with your hearing glasses on until the audio sample is finished.

18
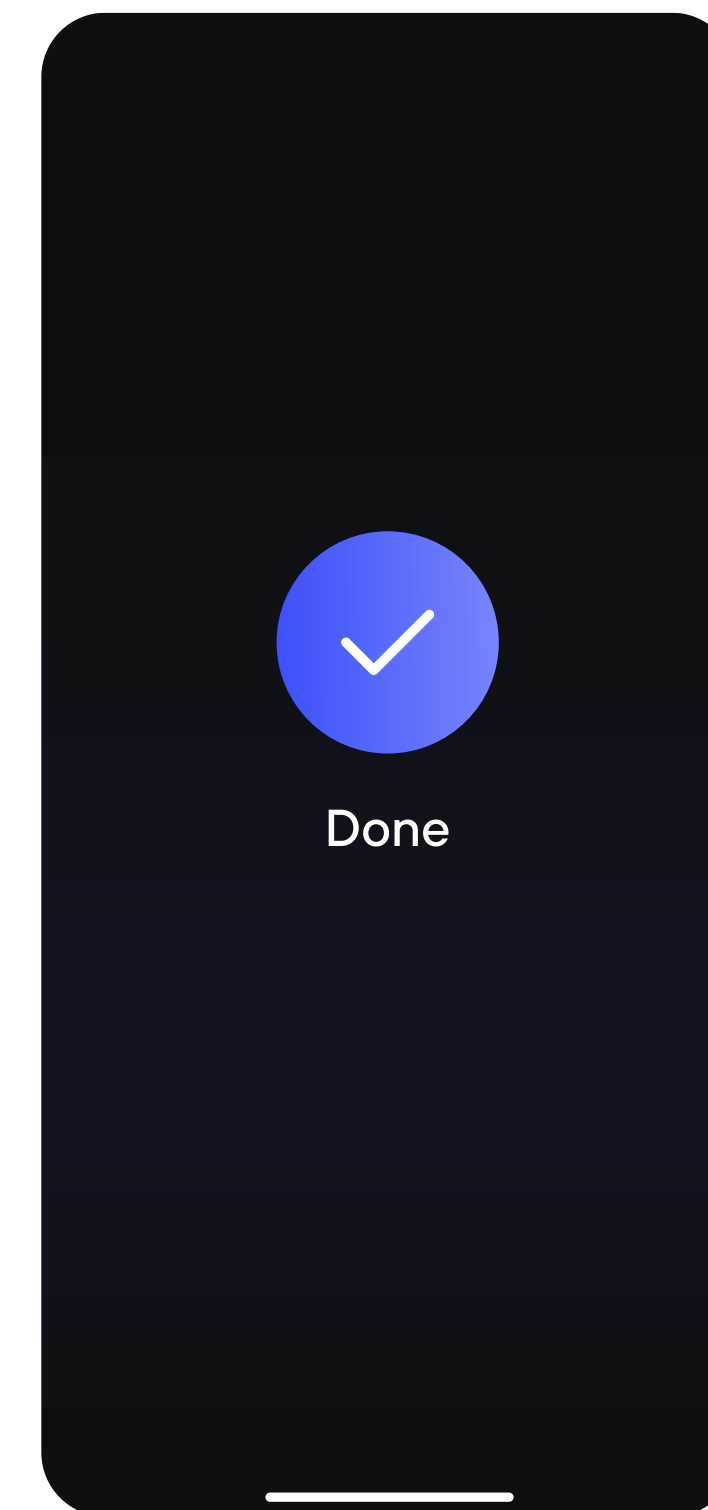

Step 2. 2
Personal calibration succesfully completed.

Done
